**Description:** I used to be the team leader. There were 10 member working under my guidance. So I have also team leader skill to manage the team to get better output.

## Internship and Certifications

**Newton School** | Full Stack Web Development

April 2022 - Present

- Full Stack Web Development
- **Technical Stack:** HTML, CSS, JavaScript, React JS, Git & GitHub, Node, Bootstrap and DSA with Java
- Participated in various coding contest organized by the platform.
- Worked on various projects like e-commerce website, Movie Booking App, Portfolio Website, Calculator, Todo list, YouTube clone and so many others.

## Projects

**Blissworld Clone** | Newton School ([link](#))

March 2023 - April 2023

### Features

- Header Section for each page
- Footer Section for each page
- Displayed different category product in different router
- Users can add, delete and edit their product for dispatching the order

**Technology used:** React JS

**Dependencies:** redux, react-redux, react-router-dom, yup

**Description:** This project is a clone of Australian based company named **Blissworld**. I have created multiple router for separating the different category product into separate router. User can remove the selected product, add the product or edit the product into the cart anytime before dispatching the order.

**TMDB App Clone** | Newton School ([link](#))

March 2023 - March 2023

**Technologies Used :** React JS

**Libraries:** react-router-dom & yup

**Description:** This is a clone project of TMDB. I have applied multiple feature in it such as movie category list, movie details, movie booking features etc. User can also find the rating, votes, release date, time duration of the movie.

**YouTube Clone** | Newton School ([link](#))

February 2023 - February 2023

### Features:

- Header Section
- Display results on each query
- Responsive
- **Technologies used:** React
- **Library used:** react, axios

**Description:** This is a YouTube clone project. We can get desired result by typing query on query section.

**Features:**

- Header section with navbar and cart button
- Product section using CSS flexbox
- FAQ section with Bootstrap
- Footer section
- Responsive

**Technologies used:** HTML, CSS, JavaScript, Bootstrap

**Description:** This project is a frond-end version of **Heets.ae** website with multiple functionality such as user can select the product, add to cart and can order the product.

---

**Skills**

Computer languages	Java, CSS, HTML, Javascript
